SELF-PACED LEARNING

Support self-paced learning with Vedubox Tutor. Your users registered in the system can repeat the course, contact you, and access the resources whenever they want, whenever they need it.

LIVE CLASS

Make live lectures with video call support in Vedubox and save them for later viewing. Thus, students can re-watch the lesson they did not understand or missed.

EXAM

With the Vedubox system, give students exams prepared with different question types during or at the end of the lesson. Check whether students have successfully completed the training with the assessment and evaluation tool.

SMARTBOARD

It is possible to carry out interactive lessons with the drawing of figures, graphics and formulas and students' access to the blackboard. The smartboard can be used just like in physical classrooms.

CONTENT SHARING

Share documents, videos and audio recordings with students in the course. Appeal to students with different learning styles with Vedubox's feature to add documents in different formats. In addition, enjoy the advantages of using an effective e-learning environment, with course content being accessible at any time.

REPORTING AND CERTIFICATION

Easily report the processes of the users participating in the training automatically. If you wish, give certificates to your users according to their participation or exam results, and have them documented.

VIDEO CLASS LIBRARY

Use the video class library to tutor your students again and again with the videos you have prepared. Any recorded video lecture uploaded to the system is securely accessed by registered users.
